Projects

Simon Says: [Website](#) / [GitHub](#)

- Game Application where users have to match the given random patterns. Once mimicked correctly, users proceed to the next level where they are presented with an additional pattern. The game ends when the user's input does not match the pattern provided.
- Tools and languages used: JavaScript, jQuery, HTML, CSS

Weather App: [GitHub](#)

- App that allows users to search any city in the US and retrieve its current weather information including wind conditions, precipitation and temperature.
- Tools & languages applied: JavaScript, HTML, CSS, Weather API

March Madness Case Study: [GitHub](#)

- Case study that involved data from the March Madness Basketball tournament. This data was filtered, sorted and aggregated to identify trends. Visuals were also created to help users better identify these trends.
 - Tools & languages applied: Python, Pandas, Tableau, Plotly
-

Experience
